

DATADIMENSION "V"

ISO 10545-2

Instrumento de laboratorio para determinar las características dimensionales en las baldosas (tamaño, anchura, rectitud de los lados, ortogonalidad, planitud de la superficie). El espesor se calcula mediante el instrumento Isothickness. La medición realiza calculando la diferencia entre la baldosa de calibración (suministrado con medidas relativas a la demanda del cliente) y las baldosas cerámicas a ensayar. El instrumento se utiliza mediante un PC común y la adquisición de datos es completamente automática. El instrumento está equipado con el software que se ejecuta con Windows XP/Vista/7 para adquisición, cálculo de dimensiones, grabación y envío a impresora tal y como se recoge en la ISO-10545-2

Equipamiento:

- 6 comparadores digitales, resolución 0,01mm WIFI
- CS software ISO 10545-2 compatible con Windows XP/Vista/7/8.1 o Tablet
- Llave de licencia de software
- Clave de comunicación USB-wifi
- Set de 3 soportes
- Notebook o Tablet completa con O.S., impresora y software 10545-2
- Gamuza limpadora

Laboratory instrument for determining the dimensional characteristic in the tiles (length, width, straightness of sides, rectangularity, surface flatness). The thickness is calculated by isothickness instrument. The measuring takes place by difference between the reference calibration plate (supplied with measures on customer demand) and the ceramic tiles to be tested. The instrument is used by means of a common PC and the data acquisition is fully automatic. The instrument is equipped with CD software that running with Windows XP/Vista/7 for acquisition, calculation of tile dimensions, recording and link to printer as requested by ISO 10545-2 standards.

Equipment

- 6 Wireless Digital gauges, readability 0,01 mm
- CD Software ISO 10545-2 for PC Windows XP/Vista / 7/ 8.1 or tablet
- Software license key • USB-Wireless communication key
- Set of 3 support • Notebook or Tablet complete with O.S. printer and software ISO 10545-2
- Metal cleaner with cloth
